Orphan Mentorship Platform — User Guide

Before You Begin — How Everything Connects

Understanding the order below is important. Each step depends on the one before it.

```
STEP 1 → SuperAdmin creates their own account (done once)
STEP 2 → SuperAdmin logs in and registers Mentors
STEP 3 → Mentor logs in and registers Children
STEP 4 → Mentor manages children (tasks, reports, visits, activities, journals)
STEP 5 → SuperAdmin monitors everything across all countries
```

> ***You cannot register a child without a Mentor. You cannot create tasks or reports without a child. Follow the order.***

Part 5 — Common Questions

Q: I did not receive my password email. Check your spam/junk folder. If it is not there, ask your SuperAdmin to re-register your account with the same email.

Q: I registered a child but they do not appear in the list. Make sure you are looking at the correct country in the country selector (top right of the screen).

Q: Can I edit a child's details after registering? Yes. Click the child's name, then click Edit on their profile page.

Q: Can I delete a child or mentor? Records are never permanently deleted — they are archived. Archived records are hidden from lists but the data is preserved.

Q: The report urgency is set to Emergency — what happens? The report is flagged and appears at the top of the SuperAdmin's urgent cases list. The SuperAdmin receives a notification immediately.

Q: Can two mentors share the same child? No. Each child is assigned to one mentor at a time. To reassign, the SuperAdmin must update the child's profile.
